## BRAINS AREN'T JUST FOR DINNER

Brains! Yum! We zombies usually try to reserve this delicate treat for dinner but, hey!, I say it's time to live it up! I not only advocate having brains for every meal but, if you can get them, have brains as in-between meal snacks, too. After all, there is already a shortage of brains in the living so you might as well treat yourself while you can. If the

living continue their current trend, there won't be any of them capable of coherent thought by the end of the decade. So, what do we attribute this trend toward less brain power? Technology. Texting, social media, and "smart" phones have accelerated the decline in cognitive functions. Luckily, us zombies have only have one thing on our minds. 🧠

## ZOMBIE ELITE

Ready for a shocker? Last year, 1% of zombies ate 19% of the total flesh consumed. The top 10% ate a record 48.2% of the total flesh eaten. That doesn't leave much for the rest of us! This inequality has got many zombies up in arms (those that have arms anyway). Zombie rights advocates are demanding that steps be taken to eliminate this disparity. 🧠

## THE TRUTH BEHIND THE SUPER SOLDIER PROJECT

Conspiracy theorists claim that the government had a secret project to create super soldiers. In fact, many believe that the zombie apocalypse occurred as a result of the super soldier project getting out of hand. **Zombie News** has discovered the

truth behind this theory. Government emails reveal an even more sinister plot. The government was not trying to create super soldiers. The government had been trying to create politicians! Yes, compliant, easily controlled, politicians. The

government plot was only moderately successful because zombies, by nature, are incapable of being disingenuous. We are driven by only one thing. Hunger. As a result, politicians started the zombie apocalypse when they fed on their constituents. 🧠

# Business Trends

## ZOMBIE CALL CENTERS

Businesses have found a new way to cut costs -- outsource their call centers to zombies. Yes, we realize that many of us zombies are inarticulate and merely moan or groan, but, businesses already gave up on offering any real customer service years ago when they started outsourcing call centers to other countries in the first place.

Now a business can cut even more costs and still give the appearance of caring about their customers.

An added benefit is that, if a customer becomes irate and demands to speak with someone that can actually talk, the call center can send local zombie representatives to the customer. They won't be able to talk either but they can deal with the customer directly and efficiently. You get my drift?

Our understanding is that

most zombie call centers even trade customers for talk time. Seems like a cost effective solution for all concerned! OK, maybe not for the hapless customers but they were just spending their lives complaining anyway. Zombie call centers give them the opportunity to contribute to society and support capitalism's bottom line. That sounds like a win-win to us! 🩸

## ZOMBIE SECURITY GUARDS

Many businesses are now using zombies as security guards. Zombies have become a low cost approach to night security for many reasons. 1) Zombies don't require payment or creature comforts. 2) They eat intruders. 3) All that has to be done is to release the zombies in a warehouse or fenced in area. 4) No training required because zombies, by nature, seek out and eat any and all intruders.

5) Even if an intruder dispatches a few zombies, it doesn't matter because all it takes is a bite or scratch and the intruder joins their ranks. Zombies are a self-replicating supply. 6) A zombie's ability to detect their prey is well documented. Their hearing and sense of smell are acute and they can detect the living within minutes. 7) The only cost is for a zombie wrangler to collect and release the zombies. 🩸

## WHY VEGANS TASTE LIKE GRASS

We all know that vegans don't taste very good. In fact, they taste like grass. Just when we think that we're going to get a mouthful of flavorful meat, all we can taste is green stuff. After much study, we think we have the answer.

Since vegans don't eat meat they don't have a buildup of flavorful fat and cholesterol. So, why do they taste like grass? Too much chlorophyll in their diet. Mystery solved! 🩸
